

Miles Cooperative Telephone Association's Network Management Practices Policy Disclosure

Pursuant to the Federal Communications Commission's Restoring Internet Freedom Declaratory Rules, Report and Order and Order, Miles Telephone's policies regarding network management practices, performance characteristics, and commercial terms are provided in entirety so that Miles Telephone's current customers, prospective customers, third-party content providers and other interested parties can make informed choices regarding the broadband Internet access services offered by Miles Telephone, and the extent Miles Telephone's network management practices may affect those services.

Network Management Practices

In the interest of providing the best online experience possible for all of Miles Telephone's customers, Miles Telephone utilizes reasonable network management practices tailored to achieve legitimate network management purposes. Because bandwidth is a limited resource for broadband Internet service providers, it is essential that Miles Telephone reasonably manages its network to promote the use and enjoyment of the Internet by all of Miles Telephone's customers. By engaging in reasonable and responsible network management, Miles Telephone uses its best efforts to deter its customers from being subjected to the negative effects of spam, viruses, security attacks, network congestion, and other risks that threaten to degrade service. The network management practices employed by Miles Telephone are consistent with industry standards.

Congestion Management

Miles Telephone does not employ any congestion management tools, practices and/or software on network traffic.

Application-Specific Behavior

Miles Telephone does not make use of any application-specific network management practices. Miles Telephone does not favor, modify, inhibit, rate control or block any specific protocols, protocol ports or fields, or any applications or classes of applications.

Device Attachment Rules

In order for a device to be approved for use on the Miles Telephone's network, the device must conform to publicly available industry standards and be non-harmful to Miles Telephone's network.

Security

Miles Telephone offers its customers unrestricted access to all of the lawful content, services, and applications available on the Internet. Miles Telephone uses industry standard tools and generally accepted best practices and policies to protect our customers from spam, phishing, and other unwanted or harmful online content and activities. In the instances where these tools and policies identify online content as harmful or unwanted, the content may be prevented from reaching customers, or customers may be permitted to identify or inspect content to determine if it is harmful or unwanted.

Performance Characteristics

Miles Telephone offers broadband Internet access service via FTTH (fiber to the home).

The advertised speed of Miles Telephone's Internet service is the maximum speed achievable with the technology utilized by Miles Telephone. While the maximum advertised speed is attainable for end users, several factors may affect the actual speed of Miles Telephone's Internet service offerings, including, but not limited to: the distance of the consumer's home or office from Miles Telephone's central office (*i.e.*, the further away the customer is from the central office, the slower the broadband speed), the end user's computer, modem or router, activity during peak usage periods, and other Internet traffic.

Based on internal testing, the mean upload and download speeds are 50 Mbps/50 Mbps, 100 Mbps/100 Mbps, 250 Mbps/250 Mbps, and 1 GIG/1 GIG. Speeds are between the Miles Telephone central office and the end user. Speeds from the Miles Telephone central office and the internet backbone may vary based on other provider's networks.

The actual speeds achieved with Miles Telephone's Internet service offering make Miles Telephone's Internet service suitable for real-time applications, such as Voice over Internet Protocol ("VoIP").

Miles Telephone offers the following specialized services: Skitter IPTV and VOIP. Any anticipated effect those services may have on Miles Telephone's broadband service.

Commercial Terms

Pricing

In order to meet the usage and budgetary needs of all of our customers, Miles Telephone offers a wide selection of broadband Internet access plan options, including promotional offerings, bundled service choices, and ala carte alternatives.

To see Miles Telephone's current promotions and pricing on broadband Internet access service, please visit our website www.milestelephone.com, or call 563-682-7111 to speak with a customer service representative.

Early Termination Fees

Miles Telephone does not require term contracts. Therefore, there are no early termination fees.

Usage-Based Fees

Miles Telephone's Internet service is priced on a flat-fee basis (plus taxes). Miles Telephone does not charge end users a usage-based fee for Internet service.

For additional information on Miles Telephone's fee schedule for additional network services, visit the Miles Telephone website at: www.milestelephone.com.

Privacy Policy

Miles Telephone affords full access to all lawful content, services and applications available on the Internet and does not routinely monitor, inspect or store the network activity and traffic of its Internet service users. However, Miles Telephone reserves the right to monitor bandwidth, usage, transmissions and content for purposes of protecting the integrity of the network and Miles Telephone's Internet access service through reasonable network management practices.

Miles Telephone may collect equipment information to identify the equipment customer is using on the network, including, but not limited to: equipment type, serial number, settings, configuration and software. Miles Telephone may also collect performance information to examine the operation of the equipment, services and applications the customer may use on the network, including, but not limited to: IP addresses, URLs, data transmission rates and latencies, location information, security characteristics, and information about the amount of bandwidth and other network resources customer is

using in connections with uploading, downloading or streaming data to and from the Internet.

Network traffic, activity, performance information, and equipment information monitored or collected by Miles Telephone is done so for the sole purpose of reasonable network management purposes.

Miles Telephone is required to comply with relevant laws, regulations and judicial orders. Information covered under this Privacy Policy, as well as other categories of information, may be disclosed to third parties if Miles Telephone determines, in its sole discretion, that such a disclosure is necessary or required. Miles Telephone may also disclose this information if, in its sole discretion, such a disclosure is necessary or required to protect our interests or the interests of our customers. Miles Telephone may also disclose this information in connection with the sale of our business.

Miles Telephone's network management practices as discussed herein are intended solely to provide the best online experience possible for all of Miles Telephone's customers by safeguarding our network and its users from spam, viruses, phishing, and other unwanted or harmful online content and activities. Miles Telephone's network management practices are not intended, nor implemented, to block consumers from accessing the content and applications of their choice, deprive consumers of their entitlement to competition, or discriminate against or in favor of certain network traffic. End users with questions, concerns or complaints regarding Miles Telephone's network management practices are encouraged to contact Miles Telephone for issue resolution.

Contact Us
